

## Maritime Research Institute Netherlands

Marin's Nautical Centre MSCN owns and sells full mission bridge simulators which are equipped with VR4MAX visual systems. Specific development is carried out by Tree C to bring the, sometimes in 360° projected area's in the simulators at animated film level of quality, yet rendered in real-time.

MARIN, the Maritime Research Institute Netherlands, has been an independent and innovative service provider for the maritime industry since 1932. The services incorporate a unique combination of simulation, model testing, full-scale measurements and training programmes. MARIN provides services to the shipbuilding and offshore industry and governments. Customers include commercial ship builders, fleet owners, naval architects, classification societies, oil and LNG companies and navies, the world over.

The combination/integration of MARIN's vast nautical simulation experience with Tree C's expertise in real time visual systems results in world leading simulators for manoeuvring, towing, anchor handling etc.
